## WORK EXPERIENCE

**Font-End Developer** WANT Web & App Design Agency (04/2019 - Present)

I specialize in developing custom WordPress themes tailored to the clients' needs without relying on frameworks. I was also part of the team that created the company's default WordPress theme based on the Bedrock structure.

**Web Head Manager** Grupo B&L (07/2016 - 08/2018)

As head of all marketing organizations within Grupo B&L Enterprises, I managed the development and implementation of the web platform. We drive our customers' success in the digital environment by creating impactful landing pages and immersive websites for the customers with a focus on quality assurance.

**Web Designer & Developer** Cafecargado Agency (01/2014 - 06/2015)

Designer and developer of landing pages and full websites using HTML5, CSS, JavaScript, and PHP for efficient data collection.

**Web Designer & Full Stack Developer** Freelance (01/2013 - Present)

Design high-performance landing pages and full-fledged websites using a WordPress foundation that leverages advanced technologies such as native PHP logic, SASS for modular formatting, Next.js for dynamic features, and Tailwind CSS for fast, responsive design and develop it.

## KEY ACHIEVEMENTS

- Spearheaded the development and implementation of the web division, driving a 20% increase in overall company profits and establishing a new revenue stream that led to job creation.
- Developed custom WordPress themes using native PHP with advanced SEO strategies to optimize performance and search engine visibility.
- Delivered high-speed Tailwind CSS development with 99% design accuracy and fidelity.
- Specialized in UX/UI design and prototyping for both websites and applications, enhancing user experience and interface quality.
